

Let science watch over your crop.

Super Trace is an organic trace elements liquid fertiliser, scientifically formulated to protect your crops from changing climate. The multi-nutrients in Super Trace will assist your crops and pastures to develop extensive root systems to resist unreliable rainfall, increase immunities against disease and stand up to frosts. It is also designed to encourage the growth of beneficial microbes for increasing carbon sequestration and nitrogen fixation. Use Super Trace at just 5 litres per hectare (0.5 ml per square metre) and help your crops achieve their true potential. For more information call **(08) 9456 5297** or **0412 912 793** and visit our website **www.wftpyltd.com.au**.
